Graduated Yoke-Lifting.—The most strengthening and health-promoting of all exercises is practiced in no other establishment in this city. It is a process which brings into harmonious action, at one effort, upwards of four hundred muscles, — arousing every dormant function of the body and imparting cheerfulness to the mind. It enables business men, whose time is precious, to get all the needed exercise of a day in a few moments. It is a safe and reliable means of

Making the weak Strong, and the Strong Herculean, doubling the strength in three months, and trebling it in a year.

As strength is the correlative of health, the importance of such a result, in a hygienic point of view, is beyond question. It is far superior to hand-lifting as a curative agent, — a fact ascertained by several years' trial of both methods in upwards of one thousand cases. It is an invaluable aid to medicine in the treatment of asthma, dyspepsia, obesity, pulmonary disease (first stage), chronic rheumatism, neuralgia, torpor of liver and bowels, and "general debility." HAND-LIFTING and every other essential exercise of a regular Gymnasium are also practiced by Dr. WINDSHIP's patients and pupils.

All kinds of

GYMNASTIC APPARATUS

constantly for sale, including the "WINDSHIP PATENT GRADUATING DUMB-BELL" (adjustable in a moment to any half-pound graduation between 9 pounds and 104), and the "WINDSHIP PATENT UNIVERSAL STRENGTH TESTER AND DEVELOPER." The latter, from the extensive range of exercises involved in its use, and the little space it occupies — only 8 feet by 4 — might be termed a

CONCENTRATED GYMNASIUM.

It is especially adapted for use in Medical Offices, Hospitals, and Academies.

REED & BARTON,

MANUFACTURERS OF

FINE ELECTRO-PLATED WARE.

At the AMERICAN INSTITUTE FAIRS, held in New York in 1867 and 1869, and at the MECHANICS' FAIR, held in Boston in 1869, REED & BARTON received the highest prizes, over all competitors, for Ware exhibited by them. We call the attention of the trade to the following extract from the Judges' Official Report:—

"The Judges are warranted in pronouncing this display of Ware to be of superior merit, unsurpassed in quality and style. The durability of Reed & Barton's Ware has been so long known to the Judges, that they feel it their duty to accord to them the position of FIRST among the manufacturers of plated goods."

Factories established at Taunton, Mass., in 1824.

Salesrooms at Factory, and No. 2 Maiden Lane, New York.

These goods can be obtained of the principal dealers in Silver and Silver-Plated Ware throughout the country.

FIRE ALARM TELEGRAPH.

JOHN F. KENNARD, SUPERINTENDENT. Salary \$2500. Office, City Hall.

[Chosen by concurrent vote.]

[He has also the care of all the Public Bells and Clocks.]

Operators, Charles A. Stearns, Jas. N. George, Cyrus A. George, Granville S. Mendell. Salary, \$3. per day.
Repairers, George S. Thom, Adam McAfee, Uzziel Putnam. Salary, \$4 per day. *General Assistant*, Chas. M. Chaplin. \$3 per day.

A constant watch is kept at the office, City Hall, night and day, by the operators. Each operator serves two alternate terms, of three hours each, as principal, and the same as assistant operator; so that twelve

hours' service at the office, out of every twenty-four, is required from each operator. No operator is permitted to sleep during his watch, unless expressly relieved by some one else, and by consent of the Superintendent.

Each operator is accountable to the Superintendent for any mistakes that may occur at the office during his hours of duty.

An accurate account is kept of the time of giving each alarm, and of the station from which it originates, and all other necessary information.

Alarms are transmitted to the Central Office, from the Signal Stations or Boxes, by pulling a slide in the Box. The police officers, and one other person resident near each station, have keys to the Boxes.

The ringing of the bells and the tapping of the Boxes, *each* denotes the number of the Station from which the alarm originated: thus, — one blow, a pause, three blows, another pause, and two blows (1—3—2) indicates that the alarm came from Box No. 132.

Alarms are usually given in less than a minute from the time the Box is operated.

Directions to those who hold Signal-Keys. — 1. If a fire is discovered in your vicinity, go to the nearest Box. 2. Pull the slide all the way down and let go; wait at the Box, and direct the firemen to the fire. 3. If you hear no reply at the Box or on the bells, pull again; if no reply, go to another Box. 4. The police, upon hearing the bells, will spring their rattles and call the number of the Station. *Cautions.* — 1. Be sure your Box is locked before leaving it. 2. Never open the Box except in cases of fire. 3. Never let the key go out of your possession unless called for by the Superintendent.

There are one hundred and thirteen Signal Stations distributed and located in accordance with the following plan: —

ANNUAL RATES.

The following annual rates of charges are established by the City Council. Payment must be made to the City Treasurer, January 1, in advance :—

Dwelling-Houses.

SECT. 27. The following rates shall be charged annually for the use of the Cochituate water :—

Every dwelling-house, including the land under, and used in connection with, the same, shall be charged, when they are valued for the assessment of taxes at \$1,000, or any less sum, and occupied by one family only, *six dollars*; and for every additional \$1,000, or fractional part thereof, *one dollar*, until the valuation for the assessment of taxes shall amount to \$25,000; and for every family more than one in a dwelling-house, the charge shall be for each *two dollars*.

In addition to the foregoing rates, there shall be charged to each dwelling-house with one family, in which a water-closet or bathing-tub is used, or in which both are used, *five dollars*; and for each family more than one, the charge shall be for each *two dollars* annually.

Tenement-Houses.

SECT. 28. For the use of Cochituate water in model or tenement-houses, which are rented in suites of rooms to different families, the rate of charge for each such tenement shall be based upon the rental of such tenement, viz: Every tenement occupied, and having a faucet within the same, shall be charged *three dollars* annually, and *fifty cents* additional on every one hundred dollars, or fraction of one hundred dollars, rent above three hundred dollars; *provided*, that the said rate may be based upon the estimated yearly rentable value of each such tenement. In addition to the foregoing rate, there shall be charged to each tenement in which a water-closet or bathing-tub is used, *three dollars*, or in which both are used, the sum of *five dollars* annually.

Each tenement in which there are no water fixtures, the occupants taking the water from taps in common with other tenants of the house, shall be charged *two dollars* annually; and an additional charge of *two dollars* annually shall be made to each tenement the occupants of which use a water-closet in common with other tenants.

Buildings.

SECT. 29. The following rates shall be charged for the use of Cochituate water in buildings occupied for offices, or by different tenants for business purposes, viz: For each office or tenement having a faucet within the same, *three dollars* annually; and for each office or tenement not having water within the same, but taking it from faucets in common with other tenants, *two dollars* annually. And in addition to these rates there shall be charged for each water-closet within the office or tenement, *three dollars* annually; and, when the water-closet is located so as to be used in common, the charge for each office or tenement shall be *two dollars*.

Hotels and Boarding-Houses.

SECT. 30. Hotels, taverns, and boarding-houses (said boarding-houses being valued for the assessment of taxes over \$15,000), not including water for baths or for uses without the house, shall be charged, for each bed for boarders and lodgers within the same, *three dollars*; *provided*, that in no case shall any hotel, tavern or boarding-house be charged less than if occupied as a private dwelling-house.

Stores and Shops.

SECT. 31. Each tenement occupied as a store, warehouse, office, shop, or for purposes not included in any other classification, and not requiring more than an ordinary supply of water, shall be charged from *six to twenty-five dollars*. For each water-closet more than one, supplied for the above, there shall be charged *five dollars* additional. And for each urinal, wash-hand basin or sink, more than one, *two dollars and fifty cents* additional.

Stables.

SECT. 32. Private stables, including water for washing carriages, shall be charged *six dollars*; and for each horse over two, the charge shall be *two dollars*. Livery stables, including water for washing carriages, shall be charged, for each horse, *two dollars*. Omnibus stables shall be charged, for each horse, *one dollar and fifty cents*. Truckmen's stables shall be charged, for each horse, *one dollar and twenty-five cents*; *provided*, that in no case shall any stable be charged less than *five dollars*.

Hose.

SECT. 33. There shall be charged for the right to attach a hose, of not more than five-eighths of an inch orifice, for washing windows or sprinkling streets, in addition to the charge for other uses, *five dollars*, and for corner lots, *ten dollars*. But no hose shall be attached, or used in any stable, for washing horses or carriages, or for any other purpose whatever, except for extinguishing fires.

Eating-Houses.

SECT. 34. Refectories, confectioneries, eating-houses, market and fish stalls, provision shops, refreshment and oyster saloons, according to the quantity of water used, shall be charged from *eight to fifty dollars*.

Baths.

SECT. 35. Public baths shall be charged for each tub *five dollars*.

Printing-Houses.

SECT. 36. Every printing-office, according to the number of presses used, not including the supplying of a steam-engine, shall be charged from *six dollars to forty dollars*.

Steam-Engines.

SECT. 37. Stationary steam-engines, working not over twelve hours a day, shall be charged by the horse-power, as follows: For each horse-power up to and not exceeding ten, the sum of *ten dollars*; for each exceeding ten, and not over fifteen, the sum of *eight dollars*; for each horse-power over fifteen, the sum of *six dollars*.

Steamboats.

SECT. 38. Steamboats shall be charged, for estimated quantities of water used for boiler and domestic purposes, at the rate of *six cents per one hundred gallons*; *provided* however, that, in cases where meters are applied, the charge shall be *three cents per one hundred gallons*.

Building Purposes.

SECT. 39. For building purposes there shall be charged for each cask of lime or cement, *seven cents*.

Fountains.

SECT. 40. Fountains are to be supplied with water at the discretion of the Cochituate Water Board; and the charge shall be upon the estimated quantity used, namely, for each one hundred gallons daily consumption, *five dollars* per annum.

Bakeries.

SECT. 41. Bakeries shall be charged according to the average daily use of flour, namely, for each barrel per day, the sum of *three dollars* per annum; *provided*, that in no case shall any bakery be charged less than *six dollars*.

Manufactories.

SECT. 42. Manufacture and other parties, supplied with water through meters or by estimated quantity, shall be charged at the rate of *three cents per one hundred gallons*.

SECT. 43. When water is required for purposes which are not specified in the foregoing tariff, the rate shall be fixed by the Cochituate Water Board.

SECT. 44. Whenever two or more dwelling-houses, or other estates, are valued together for the assessment of taxes, it shall be the duty of the Water Registrar, under the direction of the Cochituate Water Board, to make a separate valuation of the same; and whenever a portion only of any estate is justly chargeable for any water rate, it shall be the duty of the Water Registrar to make a proper valuation of the said portion; and the water rates hereinbefore provided shall apply to such valuations respectively.

SECT. 45. When large quantities of water are required, as in the case of railroads, hotels, manufacturing and other establishments, the Cochituate Water Board shall have power to ascertain by meters the amount of water used; and the proprietors or occupants of hotels, taverns, boarding houses, or any other establishment using large quantities of water, shall also have authority to place within their premises, at their own expense, a sufficient water-meter, to be approved by the Water Registrar, for the purpose of measuring the quantity of water by them respectively used. The charge for the use of water by meter shall be *three cents for one hundred gallons*, to be collected quarterly by the Water Registrar; and all such bills shall be paid within ten days thereafter, or the Water Registrar shall cut off the supply after sending a summons as provided in Section 15.

SECT. 15. In all cases of non-payment of the water rent for sixty days after the same is due, the Water

Registrar shall serve a summons at the premises of such delinquent; and unless said rent is paid within three days thereafter, together with twenty-five cents for said summons, the Water Registrar shall cut off the supply; and the water shall not be let on until the amount due, together with the twenty-five cents for said summons, and two dollars for the shutting off and letting on, is paid; *provided*, that no occupant shall be required to pay the amount due from a former occupant; and *provided*, also, that in cases of specific supplies, or for fractional parts of the year, when the water has been let on the summons may be served, and the water cut off immediately; and it shall not be let on again except upon the conditions before mentioned. The foregoing provisions shall apply when two or more parties take water through the same service-pipes, although one or more may have paid the proportion due from him or them.

SECT. 26. No hose shall be attached or used in any stable for washing horses or carriages, or for any other purpose whatsoever, except for extinguishing fires, under a penalty of ten dollars for each offence; and, if this penalty shall be incurred and shall not be paid within two days after demand for the same shall have been made at such stable, the water shall be cut off from such stable, and shall not be let on again until said penalty shall be paid, and also the additional sum of two dollars for cutting off and letting on the water.

TILTON MCFARLAND SAFE MANUF'G CO.
BURGLAR AND FIRE-PROOF SAFES,

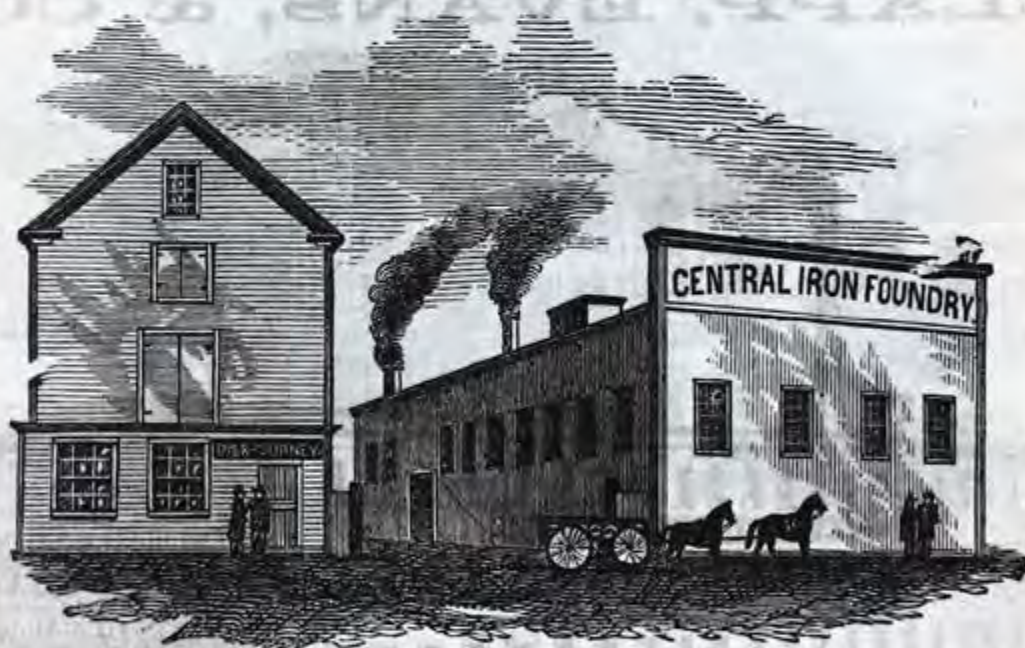

Steel Vaults and Combination Bank Vaults.

Manufacturers of MCFARLAND'S Patent BANK VAULTS and IRON SAFES of Improved Patterns.

*From the Official Report of the Judge at the Eleventh Exhibition of the Massachusetts Charitable
Mechanics' Association.*

BURGLAR PROOF SAFE.— In his efforts to produce a Burglar Proof Safe, the inventor has evidently made a long stride in the right direction. This Safe is no copy of those in general use, but is quite original; the outer shell or frame (with well rounded corners), being one continuous band of iron and steel welded together at the ends: the front and back being secured to this shell in a remarkably strong and ingenious manner. All the bolting is done from the inside, and the points of the steel bolts are hardened.

Taken as a whole, it is the most formidable obstacle ever placed between the "burglar" and his coveted treasure. We recommend the award of a gold medal.

MANUFACTURERS AND IMPORTERS OF

Surgical and Dental Instruments.

Besides a complete assortment of articles intended for the exclusive use of the Medical and Dental professions, have always in store, at the lowest prices, a great variety of the following articles, suited to the wants of the general public:—

ATOMIZERS.

Apparatus No. 15, Pat. March 24, 1868, and March 16, 1869.

All its joints are hard-soldered. It cannot be injured by exhaustion of water or any attainable pressure of steam. Is compact, portable, and cheap in the true sense of the word. Also a great variety of Hand Apparatus.

NASAL DOUCHE.

Eight Different Varieties at \$1.20 to \$3.50 each.

In using the Atomizer or the Nasal Douche, the patient should apply to his physician for the proper remedies.

TRUSSES.

A LARGE ASSORTMENT OF BEST PATTERNS from which to select, to meet the requirements of each case. If convenient, persons requiring Trusses should call at our establishment, where they can have a suitable Truss carefully fitted by a competent and experienced person familiar with the anatomy of hernia. When a call in person is impracticable, a careful description should be sent, stating whether the rupture is on the right or left side; also the measure around the person two inches below the top of the hip-bone. If the rupture is at the navel, the measure should be around the body at the navel.

N.B.—Ladies attended by those of their own sex.

ELASTIC HOSE,

For Varicose Veins, Swollen Limbs, and Weak Joints. Of these goods we have several classes of silk and cotton, possessing different degrees of elasticity, the stout silk being usually the most satisfactory. The sizes are full length (of leg), three quarters, half or knee hose, knee-caps, and anklets. Unusual sizes made to order. Also,

Elastic and Spring Abdominal Supporters, Shoulder Braces, Suspensory Bandages, Apparatus for Weak Ankles, Bow-Legs, Club-Feet, &c. Also Crutches of various and most improved kinds; Syringes, Rubber Urinals, to wear on the person day or night, for males and females; Galvanic Batteries, Hearing Trumpets, Auricles and Conversation Tubes for the Deaf; together with many other articles for use of the sick and invalids.

A GOLD MEDAL has lately been awarded us by the Middlesex Mechanics' Association, as will be seen from the following report, signed by a leading New-England Surgeon and Physician:—

"1503. CODMAN & SHURTLEFF, Boston, Mass. One Case Surgical Instruments and Atomizers.

"The Committee have no hesitation in awarding for this superb exhibition, the highest premium. * * * The various other instruments for Inhalation of Atomized Liquids, and for Local Anæsthesia, were all apparently faultless, both in design and workmanship. The exhibitors are regarded as more especially deserving of the highest token of merit for having produced nothing except of their own manufacture. *Gold Medal.* (Signed), GILMAN KIMBALL, M.D., Chairman."

"Gas Light is a costly Luxury."
Gas Light is Unsteady.
Gas Light is Eye-destroying.

Rev. W. S. TYLER, D.D., Prof. in Amherst College, says,
"I know of nothing that can compare with it. I prefer it to my gas burner. For safety, for economy, and for the perfection of the light, it deserves to come into universal use."

SAMUEL P. DUFFIELD, M.D., Ph.D., Prof. of Chemistry, Detroit Medical College, says, "I tried three times to explode it, and failed. The tests I am satisfied with; and, therefore, consider it free from any danger of explosion, which cannot be said of any other lamp."

"The N. Y. Tribune" says, "No other is perfectly safe. All the points of danger have been so carefully guarded that disaster is simply a mechanical impossibility."

CHARLES T. JACKSON, M.D., of Boston, Massachusetts State Assayer, says, "I find it to be free from all danger of explosions, when exposed to the severest proofs. I cannot fail to recommend it as the safest Kerosene Lamp I have met with. Its general introduction, in place of the unsafe glass lamps now in common use, will not only save much property from fires, but also greatly diminish, if not wholly prevent, those fearful accidents from explosions which have so often proved fatal to life."

Mutual Life Insurance Company,

SEARS BUILDING, WASHINGTON, COR. COURT STREET,
BOSTON, MASS.

Organized as the Exponent of the Non-Forfeiture Law of Massachusetts.

It was the FIRST Company to proclaim the benefits of this Statute to the public; the first to make all its policies subject to this Statute, and which had "the honor of the first practical compliance with the Statute."

All the Profits are divided among the Policy-holders. Dividends paid annually on the Contribution Plan, commencing one year from date of the policy, and may be used as Cash in payment of premiums or to purchase additions to policy.

All its Policies are Non-Forfeitable after One Payment, or entitled to a Paid-up Policy.

By reference to the Report of the Insurance Commissioner of Massachusetts, it will be seen that this Company is not surpassed by any other in the United States, as to security to Policy-holders.

KIMBALL & HEBARD'S

PATENT

IMPROVED WINDOW EXTENSION SCREEN AND MOSQUITO BAR.

Superior to all former Patents in Neatness,
Convenience, and Durability.

SHOWING THE SCREEN SHUT DOWN.

Surpassed by none in Compactness and Economy
of Time and Labor in adjusting.

A Long-felt Want supplied. Best and Cheapest to be Found Anywhere.

Messrs. KIMBALL & HEBARD, having secured the above patent, dated 4th January, 1870, No. 98,601, would respectfully direct public attention to it, it being undoubtedly far superior to any article of a similar nature at present in the market. It needs only a single glance to perceive the peculiar advantages to be derived from this invention. By a beautiful, but, at the same time, most simple arrangement, it can be adjusted WITHOUT ADDITIONAL EXPENSE, so as to fit any window, and hence will be a great desideratum, even for this reason only, to those who from the nature of their employment or other causes, are compelled to change their place of residence frequently. A margin of eight inches is allowed to each screen for lateral contraction or expansion, as may be required.

When once adjusted, the screen, which is supplied with a self-acting roll, can, if desired, be allowed to remain for any length of time, the protection afforded by its case being quite sufficient to prevent any injury by the weather. Special care has also been taken to prevent the warping of any part in any climate.

When the window is opened, the screen unrolls, completely covering the space; allowing, however, a free circulation of air, and at the same time excluding such unwelcome visitors as Mosquitoes, Flies, &c.; when closed, the screen disappears. By detaching the case from the sill, the screen remains encased on the sash, and the window can be used as if no screen were attached.

These screens will be made of first-class materials, selected by the patentees themselves, so as to insure a good article being supplied to our customers.

All persons are cordially invited to inspect our article before purchasing elsewhere. All orders addressed to the undersigned will receive prompt attention, and a liberal allowance made to the trade.

State and County Rights for sale. Agents wanted in every town and county in the United States.

Brand of Pure White Lead.*

THIS WHITE LEAD

Is Manufactured from the best American Refined Pig, from Galena, Ill., and is superior in Body, Finer and Whiter than any other American, and equal to any English manufacture.

IT IS WARRANTED STRICTLY PURE.

REFERENCE:

I have made Chemical analyses and examination of this brand of White Lead, with the following results:—

It consists of pure carbonate of Lead, free from dust or any impurity, ground in Oil. It has uncommon body, or density, and is finer and whiter than other standard brands. This Lead is ground in pure Linseed Oil, free from destructive chemicals, and it has all the most desirable characters of a superior White Paint.

Respectfully,

S. DANA HAYES, *State Assayer and Chemist.*

Washing Machine and Table Combined.

This Washer supersedes all others ever invented. It is mere recreation for a girl or lady, who can do a large washing without wetting her hands. It will wash more rapidly and cleaner than any other machine, and not wear the clothes. It takes up no room in the kitchen or washroom, and is useful at all times for an ironing or kitchen table.

Agents Wanted everywhere. State and County Rights for Sale.

CARPET SWEEPERS.

First Premium awarded at the last Mechanics' Fair.

WEED'S New Improved Patent Double-Gear Carpet Sweepers.

These Sweepers have double the propelling power of any other, and revolve more than twice as rapidly, and are the only good and practical Sweepers made.

We have manufactured Carpet Sweepers for the last ten years, and hold the best patent claims.

The public are cautioned about buying any imitation of our Sweepers, which may interfere with our patent rights.

Carpet Sweepers repaired, and the new improvements applied to old ones.

Agents wanted everywhere.

We also manufacture, and sell at wholesale and retail, the best *Spring Beds*,

E. D. SPEAR, M.D., THE OLD INDIAN DOCTOR,

SO MUCH CELEBRATED FOR HIS REMARKABLE CURES.

Office, 713 Washington Street, - - - BOSTON.

THE medical record of Dr. E. D. SPEAR, as a successful physician in the treatment of chronic diseases, is without parallel. Many are suffered to die who might be saved. Dr. Spear makes a direct appeal to the substantial, intelligent, and cultivated citizens of our country, and asks that his claims as a physician of extraordinary powers may be investigated. If you are beyond human aid, Dr. Spear will not deceive you. If you have ONE CHANCE, he will save you. Come to his office, and consult him, free. If you cannot visit him, consult him by letter.

STATEMENT OF WM. B. TRASK, ESQ.

DORCHESTER, November 22, 1865.

DR. E. D. SPEAR. Dear Sir, — I have long been desirous of expressing in writing my grateful appreciation of your kind and beneficial service to me when an invalid. I went to you, an entire stranger, on the 28th of August, 1856, — more than nine years ago, — about as weak in body as one could be, and walk. I had become thus reduced by a long and close application to a business unsuited to my condition. My blood being in a bad state, an irregularity of circulation was produced, and a derangement of the vital organs, which would probably have soon terminated fatally, had there not been an immediate application of the proper remedies. Your excellent medicines and timely advice soon produced a change, slowly, but surely, renovating the whole system.

By continued perseverance in following out your judicious directions, I owe, under Providence, my restoration to what my friends and myself consider a good degree and permanency of health. I would therefore cordially recommend to those who are afflicted, a fair trial of what I consider your superior medical treatment. With sincere regards, I am, yours truly,

WM. B. TRASK.

Words will not suffice in this case to describe the remarkable effects of the Doctor's treatment.

**Mr. DOE previous to
treatment.**

**From a Photograph of Mr.
Doe, taken April 9th, 1869.**

For the benefit of the sick, I wish to make a statement of my case. I had been gradually failing in my health for some time, when I was taken with severe bleeding. My cough grew troublesome. I raised very bad matter from deep down in the lungs. The bleeding returned upon me frequently; in January, 1868, having had an alarming fit of bleeding, I thought, unless I soon got relief, my days would be few. My hope was about gone. Seeing Dr. SPEAR'S card in the papers, I was reminded of several remarkable cures of his which had come under my notice. I concluded if he could not cure me, no one could, — I would make the trial. I immediately put myself under the Doctor's treatment, and wonderful as it may appear in such an extreme case, not a week passed before I felt the good effects of his medicine, and in two months the change in me seemed miraculous. It has now been a year and a half, and I have taken a new lease of life. The Doctor tells me there is no reason why I may not live many years. The pen cannot convey the remarkable change in me. I have therefore furnished Dr. Spear with my photographs, — one taken before consulting him, the other taken the 9th of April, 1869. I know there is a strong feeling among some against a physician who advertises; but, if there is one thing better than another, or one physician who is more likely to cure us than another, why not let the people know it? Dr. SPEAR cured me when I was seemingly beyond hope, and I wish to tell everybody about it.

BOSTON, July, 1869.

CHARLES O. DOE.

BOSTON, Sept. 10, 1869.

DR. SPEAR. — Dear Sir: My weight is now 183 pounds, the highest figure I have ever weighed.

CHARLES O. DOE.

DR. SPEAR can be consulted at his office, 713 Washington Street, Boston, or by letter, with stamp, free of charge, upon ALL diseases.

Those who have failed to be cured by other Physicians, are especially invited to call on Dr. Spear.

These Engines are peculiarly adapted to places where there are no brick, tools, or other conveniences for setting a boiler or engine, being ready for operation on delivery. For discharging coal, they are the most expeditious and economical of anything used for that purpose. These Machines may be seen in operation in all the large cities in the United States and the Canadas.

# BUERK'S

## Watchman's Time Detector.

---

**THIS WATCH-CLOCK** was introduced to the public in almost every section of the United States and Canadas, about five years ago; and it has proved itself to be the best invention in the world for testing the faithfulness of Watchmen. Since its introduction, the Proprietor has improved on some parts, and corrected deficiencies which have been suggested by using it; and he has now a perfect check upon the Watchman. With other clocks, a regular routine has to be followed; but with this, a Watchman can be ordered to visit any particular place as often as required, without being compelled to go to places where it is not necessary to visit as often.

The instrument is complete in itself, portable, and as reliable as the best lever watch.

It is not so likely to become disarranged in its works as a good watch, because its parts are stronger; but, when it needs cleaning, any common watchmaker can adjust it, its mechanism being simple.

It requires no fixtures or wires communicating from room to room, as is the case with the ordinary Watch-Clocks: a small, inexpensive, stationary key is alone required at each station.

Its use is not restricted to a single building; and places can be guarded that it would be impossible to guard with any other instrument, such as Railroad Tunnels, Bridges, Yards, Shops, &c.

The instrument will, in all cases, be warranted perfect and satisfactory. Its price is invariably

**Seventy-Five Dollars, Cash on Delivery,**

Including as many Keys as are requisite, not exceeding twelve.

**This Watch-Clock is sold at a less price than any other in the market.**

The DETECTOR is used extensively by large Manufacturing Establishments and Railroad Companies in the United States, from whom numerous testimonials have been received.

N. B. — Parties purchasing these Clocks should test them sufficiently in the counting-room or office, as they will not be taken back after having been injured by the Watchman through carelessness.

All communications promptly attended to.

ADDRESS:

**J. E. BUERK, Proprietor,**

**47 CONGRESS STREET, BOSTON.**

**P. O. BOX, No. 1057.**

---

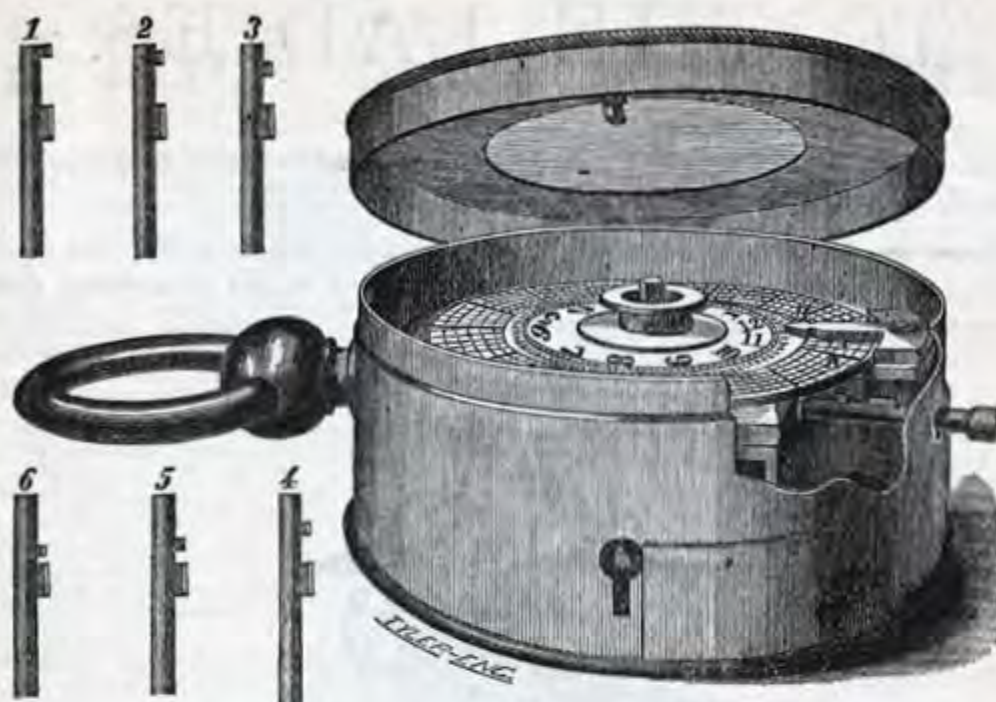

N. B. — It is very essential to carry the clock secure, taking care that it is not brought in contact with any hard substance, and thereby broken. I have on hand POUCHES, with Straps to go over the shoulder and around the body, which I will send with the Clock, if ordered. Price, \$2.50.

---

*This DETECTOR is covered by two U. S. Patents. Parties using or selling these instruments without authority from me will be dealt with according to law.*

# Buerk's Watchman's Time Detector.

All large corporations or manufacturing concerns employ Watchmen, who look to the safety of the several buildings, and are expected to be vigilant in guarding the interests committed to their charge. Property of immense value is thus at the mercy, so to speak, of one man; for, if he is neglectful of his duty, he is not only dishonest, but jeopardizes the daily bread of numberless persons who may have funds invested in the concern.

To hire one Watchman to look after the other would not be a very wise proceeding; for, by collusion, they might set at naught all such precautions. Recourse is therefore had to machinery, — silent, insensate wheels and springs. By the judicious combination of these, tales can be told which result in the dismissal of the untrustworthy servant, or his retention and reward if found worthy.

The above engraving is a view of a Time Detector, which is carried about by the watchman to all the different stations to be guarded. At each station is a small key, securely fastened to prevent his taking it with him. The watchman goes from station to station, takes the key fastened there, inserts it into the clock, gives it one turn, and goes on to the next, or to any other station, for he is not bound to go in regular order. By this, it follows that a perfect record will be kept of each operation.

The broken-out portion of the watch shows the mechanism which operates the pin which pricks the paper. At A, there is a number of sliding bars which connect with the pricking points, so that, by turning round the key, the ward on it strikes a certain bar, and penetrates the dial paper B. By that act, a small hole is made in the paper, which tells what time the man appeared at each station; how often he came there; how long he stopped; how long it took him to go from one to another; whether he went in regular order or not; in short, it gives a complete record of his night's work.

The small figures are views of different keys. A flange on the side of the key prevents it from being turned unless it is inserted quite into its place; so that the key used for one station cannot be used to make a mark for a key at another, nor, indeed, can any key except a perfect duplicate be made to do it. Any attempt on the part of the watchman to evade his duty by counterfeiting keys may be effectually baffled by occasionally changing keys from one station to another. An indefinite number of stations can be served.

The watch is wound, set, and closed each evening by the proprietor or superintendent, and the box locked with a key which he keeps, so that the register within is unseen by, and out of the reach of, the watchman who carries it. In the morning, when the Detector is returned to the superintendent, the graduated disk of paper may be removed from its position, and filed, like a telegraph despatch, as a permanent record, while a new disk is applied for succeeding records.

# WE WILL FURNISH WORK TO THE LADIES.

"I CANNOT AFFORD TO BUY A SEWING MACHINE" is a very common remark; but we never heard it said, "I DO NOT WANT ONE."

LADIES, whatever may be your circumstances to-day, who can tell what they will be to-morrow? Thousands before you, have been reduced from the highest state of wealth to moderate want, and only saved from entire destitution and suffering by having

**TIME TO PAY FOR THE SAME IN WORK,**

OR, IN OTHER WORDS,

*Wait for the Machine to Pay for Itself.*

To all who buy Machines of us we supply work if they desire it, which may be done at home, and for its satisfactory execution we will pay market prices. A few hours each day devoted to this work (even by the mother with her many cares) will pay for a Machine in a few months. Then every Lady CAN and SHOULD HAVE A SEWING MACHINE.

Every Machine sold by us is warranted new, in perfect order, and having the usual complete outfit requisite for operating it successfully. When necessary, we give thorough instruction in the use and care of the Machines, without extra charge.

Remember, you can now secure, as above, your choice of any **FIRST-CLASS SEWING MACHINE** at the manufacturers' established prices.

N.B. — We also sell Sewing Machines for Cash, and Cash instalments, at low prices.

## BAYSIDE LIQUID SOAP.

ALLEN & CO.,

35 Sudbury Street, - - Boston.

For your own sake, read the following:

WE sell the **only perfectly pure Soap** in the world! Nonsense! you reply. But is it nonsense? Let us see. Our Soap is a **liquid Soap**. Every drop of it is soap, and nothing but soap. You can't make a solid soap without putting in "filling." Many solid soaps are "filled" with

rosin. Buy a piece of rosin, and see how much cleansing power it has. None at all; you'll soon find that out. Reduce your bar-soap to a liquid, take out the filling and other adulterations, and how much pure soap is left? Mighty little you'll find.

Now our Soap is a **LIQUID**, and that means a good deal. Thus, your bar-soap you have to rub, rub, rub, into the cloth, and then rub, rub, rub, out again; and you can't rub it all out either. Our **LIQUID** silently permeates the cloth, and is working away while you are asleep, and all you do to take it out is to rinse the cloth in clean water.

Does it injure the fabric? Not one bit. Try this test; certainly a severe one:—

Take an eighth of a yard of bleached or unbleached cotton; cut it in halves; soak one half in a bottle of the liquid ten times the strength used in washing, and the other half in a bottle of pure water, each for a week, and see if you can find any more harm done to the piece soaked in the liquid of fourfold strength than to that soaked in the pure water. If you can, please notify us at once, as we are vitally interested in the discovery.

# BLAKE'S STEAM PUMP FACTORY

51 CHARDON STREET, BOSTON,

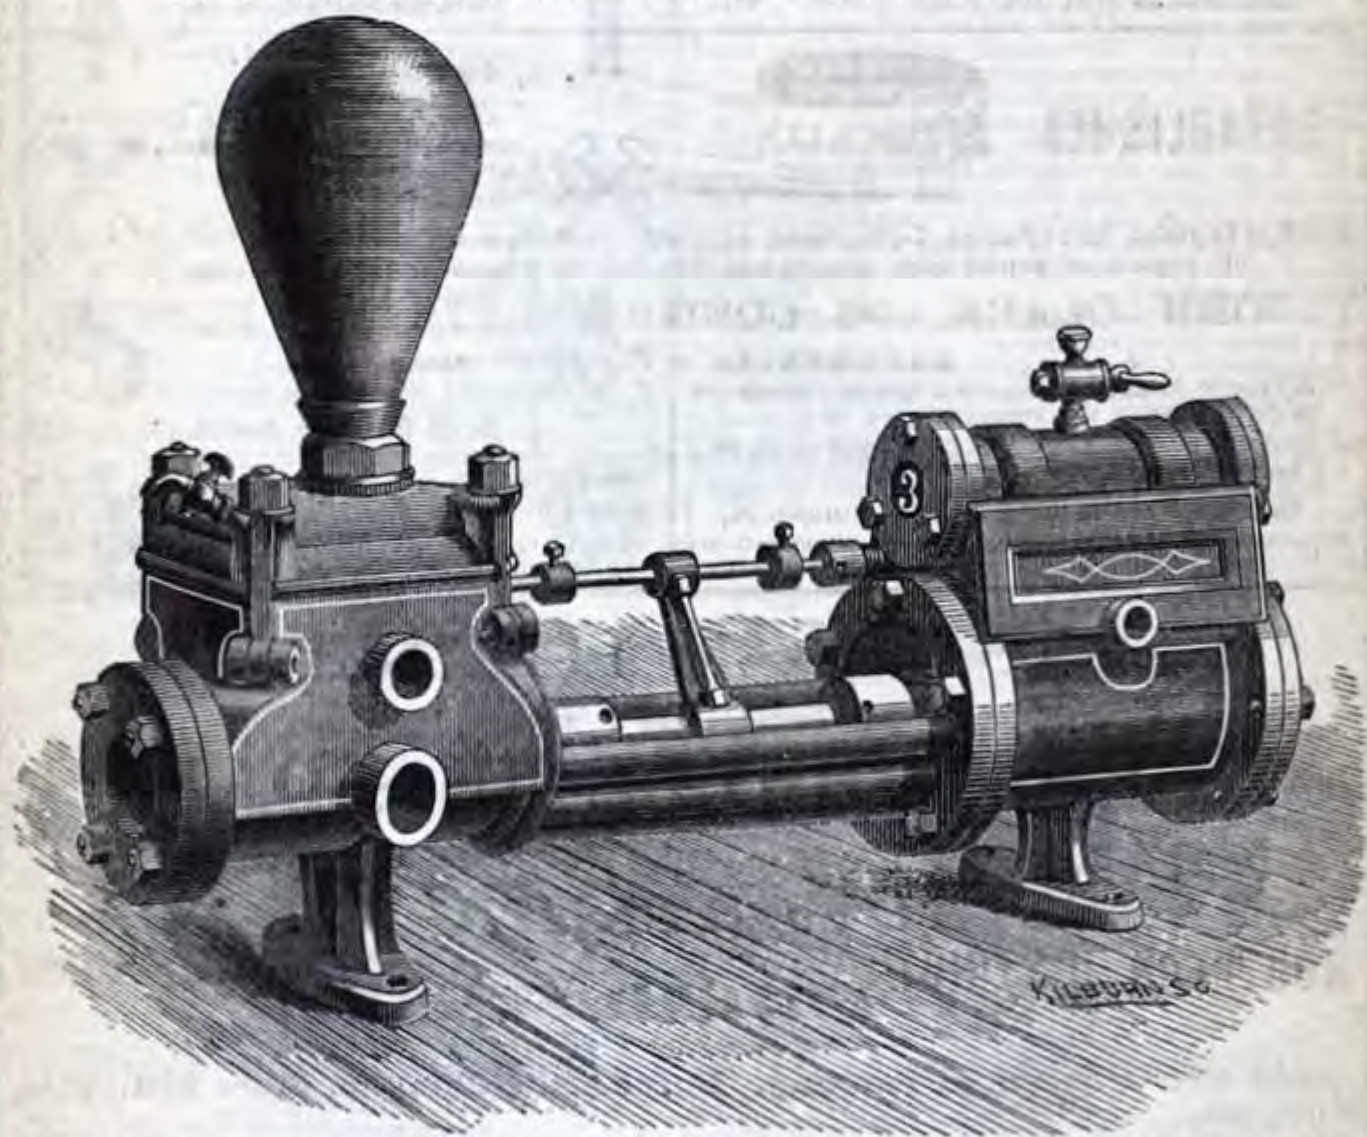

Is turning out daily every variety of Pumps manufactured under the numerous patents owned by GEO. F. BLAKE & Co. We would direct attention to the following special pumps, viz:

## BLAKE'S PATENT

**FIRE PUMP**, the most powerful made.  
**BREWERY PUMP**, for thick mash.  
**OIL PUMP**, for crude or refined.  
**ACID PUMP**, of pure composition.  
**TANNERY PUMP**, pumps Bark and Liquor.  
**LOCOMOTIVE PUMP**, very simple and compact.  
**GAS-WORKS PUMP**, for condensers and gas tar.

**SUGAR-HOUSE PUMP**, for Syrups, etc., etc.  
**LARD PUMP**, Hot or Cold.  
**SOAP PUMP**, for soap, hot and cold lye.  
**VINEGAR PUMP**, Proof against Acids.  
**MINING PUMP**, for the deepest mines.  
**BLEACHERY PUMP**, large water capacity.  
**BOILER FEED PUMP**, will work with three pounds of steam.

A LARGE ASSORTMENT ON HAND FOR GENERAL WORK.

### *The following Points are universally conceded for the Blake Pump:*

That it is positive under any pressure; will run at any speed, — slower or faster than any other, — will discharge more water than any other pump of same dimensions. The steam part being cast in one piece obviates the trouble arising from leaky steam joints, which are always a source of vexation. Any part can be disengaged without interfering with another part. The steam valve is perfectly balanced. It will start at any point of the stroke, and will discharge the cold water of condensation. The workmanship and materials are of the very best class, being equal to the best built engines. It will pump hot, cold, thick, thin, clear, or gritty liquid, including the extremes of lager-beer "thick mash," at boiling point, or gas tar in mid-winter, the valves being suitably arranged for the work. The hot-water piston (a recent invention) is adjustable to any pressure, without the use of check nuts or wrenches; is perfectly elastic, compensates for wear, and is always tight. The hand-power attachment — the right of which is owned by this firm — is the **ONLY ONE** which is recognized as of any **PRACTICAL VALUE**.

BOSTON, May 8, 1878.

Messrs. GEO. F. BLAKE & Co.

*Gentlemen.* — We will say in reply to yours of this date, that the special Steam Pump you built for us pumps hot or cooled lard without the slightest difficulty. We consider your device for keeping the pump always clear and ready for action, of great value and entirely original. It possesses an advantage over all other steam pumps in the simplicity of its arrangement, giving a ready access to the examination of its valves. We believe yours to be the only one yet constructed which will pump lard at all times and seasons of the year satisfactorily. Your No. 3 Pump, which feeds our boiler, works to our entire satisfaction.

**VOICE-BUILDING.**

This is a new and verified Theory for the Mechanical Formation of the Voice.

Its principles are simple and definite; and, when it is reduced to practice, it is certain in its results. It restores debilitated throats, and so forms the voice as to completely protect the organs from injury, and prepare them for the discipline of Elocution.

**J. & J. KOHLER & CO., Patent Double Hot-Air Chamber Furnace.**  
**Patented Oct. 15, 1867. Portable and Brick.**

This Furnace is perfectly original in principle, and will be found on examination to combine in itself qualities which for heating buildings of all classes cannot be surpassed.

This Furnace is so constructed as to contain two distinct hot-air chambers; cold air is introduced separately into each chamber, thus producing a much larger amount of hot air, which cannot be obtained by other furnaces. This furnace we claim to be perfectly free from gas, which is a very important point; the joints are adjusted so that the escape of gas or smoke into the hot-air chambers is entirely prevented, without the use of putty or cement of any kind whatever. By the arrangement of having two distinct hot-air chambers, it enables the furnace to heat rooms equally and at remote distances without being obliged to close registers in rooms near the furnace. This improvement is a highly important feature, and will be appreciated by those who have had experience in heating buildings with furnaces of the ordinary construction. About four hundred of these furnaces have been put up, and all of which have given perfect and entire satisfaction. Call and examine this furnace before purchasing elsewhere.

For sale at 540 Washington St., Boston, Wholesale and Retail. **J. & J. KOHLER & CO.**

MANUFACTURER OF THE

## RANDALL SKELETON GRATE BAR,

PATENTED FEBRUARY 9th, 1869.

### TESTIMONIALS.

PORTLAND, March 2, 1870.

A. O. CORBETT. Dear Sir,—In answer to your request for my opinion as to the value of the Randall Skeleton Grate Bar, I will say that I am well acquainted with the form and working of them, and can safely certify that I believe them to be the best in use. First, because they give more air space for a given amount of surface than any that I know of. Second, they are calculated better for an equal thickness of metal, thereby preventing warping or cracking. Thirdly, they require less weight of iron to make a given surface of grate. Reasons sufficient to make them the best grates now known.

Yours, truly,

JOHN SPARROW.

MILFORD, March 12, 1870.

A. O. CORBETT. Dear Sir,—I have used the Randall Patent Grate Bar nearly a year, and they are the best I ever used. They work admirably.

R. C. HUSSEY.

BOSTON, March 26, 1870.

Having used the Randall Skeleton Bars, in connection with the three large Steam Boilers attached to the St. James Hotel for nearly two years, I do not hesitate to recommend them, especially for durability, and also for general excellence for the purpose designed.

M. M. BALLOU, Prop. St. James Hotel.

BOSTON, Dec. 10, 1869.

A. O. CORBETT. Sir,—I have been using the Randall Grate Bars in one Furnace, on board steamer Star of the East, since April 15, 1868. I find them the best I have ever used. They give better draught, and burn the coal up cleaner, and leave less ashes and clinkers than any grate I ever used.

L. S. DAVIS, Chief Eng'r Star of the East.

BOSTON, Jan. 22, 1870.

With the evidence I have of the saving of coal by the use of these bars, I recently ordered and have just received 52 more grates.

JASON COLLINS, Captain Steamer Star of the East.

WORCESTER, Jan. 27, 1870.

A. O. CORBETT. Dear Sir,—We have given your Grate Bar a trial for the last three months, and it has given perfect satisfaction. We have given it some severe tests with leather chips, which make the hottest fire.

Yours, truly,

D. G. RAWSON & CO.

BOSTON CUSTOM HOUSE, Jan. 14, 1869.

A. O. CORBETT. Dear Sir,—In answer to your inquiry how the Randall Grate Bars work, I will say, I have used them nearly a year, and they are as good to-day as when put in. I consider the very best recommendations that can be given of them none too good.

Yours, truly, H. ROBERTS, Eng'r.

BOSTON, March 3, 1870.

A. O. CORBETT. Dear Sir,—We have been using a set of the Randall Skeleton Grate Bars seventeen months. They have not warped in the least, and are as good as new. We cheerfully give you this testimonial in answer to your inquiry.

# WAVERLEY HOUSE,

**Charlestown Square, Boston, Mass.**

**ON THE EUROPEAN PLAN.**

*Five minutes' walk from the Railroad Depots.*

*Fifteen minutes' walk from the Boston Post Office.*

*Horse-Cars pass from the house every minute.*

*Cost of Carriage Hire from depots to the house refunded at the house.*

*Prices lower than those of any other first-class hotel.*

This splendid hotel is one of the largest in New England, containing nearly five hundred rooms, which overlook the harbor and surrounding towns. Its elegant Dining-room will seat three hundred and fifty persons at its tables. The House will accommodate nearly one thousand guests. The rooms are large, and carpeted with velvet and Brussels carpeting, and furnished with elegant black-walnut furniture. Soft water is carried to every sleeping-room; and each has also a closet six feet square, making it very convenient for family-boarding. Bathing-rooms and water-closet on every floor.

The whole house is kept at a moderate temperature in winter by steam, the boilers for which are in a building outside of the house. In summer the house is cool and airy, as there is nothing to obstruct the free circulation of air, making it a desirable resort for summer boarders.

The Waverley House has seven elegant parlors, extending two hundred and twenty feet, all fronting on a public square of two acres, in the centre of which is a fountain, surrounded by a beautiful lawn, one hundred and fifty feet in diameter.

The tables are supplied with the best materials that the markets afford, and first-class cooks serve them in the best style. There are also a large billiard hall and a splendid barber's shop in the house.

Those who once visit the Waverley House will ever after make it their home when they visit Boston; as it is the most convenient to reach from most of the railroad depots, and from the centre of trade, and the most home-like of any hotel in the city.

*Those who arrive in Boston by the cars can take a coach, and order it to drive to the Waverley House, and the cost of so doing will be refunded at the House.*

Letters in regard to the House can be addressed

# KNOWLES' PATENT STEAM PUMP,

Patented in England and France.

This Pump has received the **HIGHEST PREMIUM** at every Fair where it has been exhibited, viz.: New York, Boston, Baltimore, Cincinnati, Buffalo, Syracuse, Springfield, and Worcester.

It has no Cranks or Fly-Wheel, and has no dead points where it will stop; consequently it is always ready to start without using a starting bar, and does not require hand work to get it past the centre, and is the only Pump made that will work its steam valve with water; consequently is always ready to start when the steam cylinder is filled with cold water of condensation.

*It is adapted for Factories, Steam Ships, Sugar Refineries, Breweries, Distilleries, Gas Works, Oil Works, Soap Works, Paper Mills, Tanneries, Bleacheries, Laundries, Railroad Purposes, Quarries, Petroleum, Mines, Drainage, &c., &c.*

Arranged for Pumping Thick or Thin, Hot or Cold, Acidulous or Pure, Gritty or Clear Liquids.

It has been used for more than eight years for feeding **STATIONARY STEAM BOILERS**, and has been used more than five years on **LOCOMOTIVES**, and is the only Steam Pump yet tried that is in every way adapted for that use.

The steam cylinders are fitted with the most perfect spring-ring packing, with screws and springs. The water cylinders are fitted with composition heads and rings, adjustable by screws, or with leather rings, or a patent fibrous head, according to the nature of the work required. All the joints are ground to fit, and require no packing. The glands and piston-rods are solid composition. The valve seats are composition, and the valves either rubber or metal, and are very durable, and are placed in the pump so as to be easily accessible, and, in the larger sizes for fire or marine purposes, are got at immediately without removing nuts or bolts.

**Large Pumps for Water Works. Fire and Wrecking Pumps.**

**PUMPS GUARANTEED FOR EVERY SITUATION.**

In case of wear or accidental breakage of any part of a Pump, an order by telegraph or mail will bring a new part by first express, as all the parts are made to interchange and fit. The wires of the Western Union Telegraph Co. are connected with the office of our Manufactory, which puts us into telegraphic communication with all parts of the country.

The proprietors offer this Pump as the most *Perfect Independent Steam Pump* ever invented, and for *simplicity and durability* defies competition.

## J. R. SMITH'S Patent Furnace Grate Bar,

For Steamboats, Steamships, Locomotives,  
Stationary Furnaces, &c.

Patented Nov. 5, 1867.

**J. R. SMITH, Proprietor & Manufacturer,**  
**SALEM, MASS.**

Office, cor. Peabody and Union Streets.

These Bars are acknowledged by all practical engineers to be superior in every respect to all other Bars in use. We claim a superiority over all other Bars on the following points: 1st, **DURABILITY.** By making the ribs with a double curve, the Bar is not so liable to be strained and injured by unequal heating as it would if the Bars were straight, or even of a single curve. If one side of the Bar becomes heated first, it yields on the opposite side, thus preventing any injury to the Bar, such as warping, twisting, cracking, etc., which would otherwise result from the sudden expansion of one side without suitable provisions for a corresponding bending on the other side. They will last one-third longer than any other Bar in use. 2d, **STRENGTH.** Their peculiar construction, and the distribution of the metal, renders them the *strongest*, and, at the same time, the *lightest* Bars ever made. They cannot sink vertically, being supported by two strong arches, which enables them to support great weight, and endure very high heat. 3d, **ECONOMY OF FUEL.** By double curving the Bar, a livelier draught of air is afforded, producing more perfect combustion and more steam than any other Bar with the same quantity and quality of fuel. The strain of expansion being overcome by the spring of the Bar, a uniformity of *air spaces* is preserved, insuring a free draught at *all times*, thereby greatly saving fuel. They are admirably adapted to the burning of all kinds of fuel, from the finest dust to the coarsest coal. These Bars have been extensively used for the last year, and in every case have given entire satisfaction. We are prepared to furnish them at short notice, and on very reasonable terms, suitable for all kinds of fuel; and warrant them to give satisfaction. Parties desiring Grates will please bear in mind that they are made to fit any place where the common straight bar, or any other style of Grate, has been used, and that no alteration of furnace is required.  Orders respectfully solicited, and immediate and prompt attention given.

# WASHINGTON LIFE INSURANCE COMP'Y

OF NEW YORK.

CHARTERED, - - - 1860.

Cash Assets Exceed \$2,000,000.

Annual Cash Dividends to Policy Holders.

Policies and Dividends protected from Forfeiture.

The entire Profits are equitably divided among the Policy-Holders annually. Dividends are never forfeited (a feature peculiar to this Company), but may be paid to the Policy-Holder in cash, or applied to increase the amount insured, from and after the Second Annual Payment, at the option of the holder.

It is the only Company which applies its dividends to hold good a policy which otherwise would be null and void from non-payment of Premium. If a Policy which has a Dividend credited upon it lapses from non-payment of Premium, the Company will hold the Policy good for such a proportion of a year (or years) as the Dividend bears to the annual Premium. For instance, a man paying a Premium of \$365 annually on a Life-Policy of \$10,000, and having Dividends of \$288 standing to his credit, would be held insured for \$10,000 for 288 days (9 months 18 days) after failing to pay his Premium! In some cases, the accumulated Dividends would keep a Policy in force several years.

**NEW YORK.**

This House, one of the most elegant and comfortable in New York, and long since firmly established in public favor, is now under the sole proprietorship of Mr. CHARLES B. FERRIN, who was for thirteen years at the Parker House, Boston.

Its recommendations to travellers were never so strong as they are at present, and, under the personal direction of the proprietor, every attention is given to the comfort of guests. It is in a very quiet locality, and yet in close proximity to Broadway, to the principal places of public amusement and to the Twenty-seventh Street Depot. Its *Cuisine* enjoys an unrivalled reputation, and its appointments are in every respect of the most perfect description.

To travellers of taste, culture, and refinement, to those who appreciate the comforts of a Home, united with those of a sumptuously appointed Hotel, THE WESTMINSTER commends itself very strongly indeed, as its success for the past three years has fully shown.

And not only by continued, but by *increased* effort will its Proprietor endeavor to merit the favors of the travelling community.**CHAS. B. FERRIN,***Sole Proprietor.*

# STEERE'S IMPROVED Self-Lubricating Spindle Bolster.

Patented January 21, 1862, and November 8, 1864.

MANUFACTURERS, and those using Spinning Machinery, are aware of the great waste of oil and of the time that is required in oiling, and of the difficulty of keeping the frames and floor free from oil, with the ordinary bolster. The bolster here described, you will see by reference to the drawings (figs. 1, 2, and 3), is arranged with a lubricating device, which, while holding a supply of oil in reserve, yields a sufficiency to keep the bearings well lubricated. You will see in the upper portion of the exterior shell, *h*, there is formed an annular chamber surrounding the spindle bearing, but separated therefrom by the inner shell, *f*, through which are formed two or more passages, *e, e*, for conducting the lubricating liquid from the said chamber to the spindle bearing. This chamber is stuffed with cotton or other fibrous material, the office of which is simply to hold the oil in reserve within the chamber; in which capacity, it will be seen that the said fibrous material does not bear against the spindle, but is removed from contact therewith by the bronze bearing, or inner shell, *f*. The absorbent does not, therefore, interfere with the free turning of the spindle in its bearing, but, as the spindle revolves in its bearing, the oil is drawn through the passages, *e, e*, to the bearing, and forms a thin stratum between the two surfaces, and keeping them well and uniformly oiled.

This Bolster has many advantages over the ordinary Bolster now in use; some of which are as follows: Parties that are using them, say that they require oiling only once or twice a week. They say that they will save from 50 to 75 per cent in oil, and 75 per cent in time in oiling and cleaning the frames. They keep the bearings more uniformly oiled, thereby being but little wear and friction, and imparting a more free and steady motion to the spindle. They keep the frames and floors more free from oil, which adds greatly to the neatness of the spinning room. They are made to fit any size spindle, and are applied to mules and jacks with a neat, light iron rail, which adds durability and beauty to the machinery.

Parties about to contract for new spinning machinery, or make repairs on the old, will find it greatly to their advantage to apply these Bolsters. There have been 600,000 of these Bolsters put in for the last six years, and the best of references can be given as to their superiority.

**DIRECTIONS FOR OILING AND MANAGING THE BOLSTER.**—When they are first oiled, there should be oil enough put in to saturate the absorbent well; and then oil once or twice a week, with about the same amount of oil that you commonly put on the ordinary Bolster in one day. Oil mules from one to three times a week.

There are more than a hundred different companies and parties now using this Bolster, all of which concur in their testimony as to the merits and value of the same. Some of the parties and companies, and a few of the many certificates, are here given.

E. N. Steere, Esq.: Dear Sir—This is to certify that we have been using your improved Self Lubricating Bolsters since May, 1861, and find them to be all they are recommended to be in every respect.

A. GREEK, Superintendent.

BABCOCK & MORSE, Manufacturers, Westerly, R. I.  
P. PECKHAM, Overseer.

East Hampton, Jan. 28, 1864.

E. N. Steere: Dear Sir—Your Improved Self-Lubricating Spindle Bolster, that we have been using for the last two years, are giving entire satisfaction; where we were accustomed to oil twice a day, we now oil only twice a week; and the saving can fairly be estimated at seventy-five per cent in oil, and time in oiling and cleaning frames; and in other respects they fully meet our expectations.

Respectfully yours,

SAMUEL WILLISTON.

North Scituate, January 27, 1864.

E. N. Steere, Esq.: Dear Sir—We have been using your Patent Bolsters in our frames and mules since October, 1861, and find that they do the service in every respect as recommended, and I think I can safely recommend them to all as a great improvement, and the best Bolster in use.

Yours, &c.,

IRA COWEE, Sup't in Scituate Manuf. Mills.

Providence, November 30, 1864.

E. N. Steere, Esq.: Dear Sir—Your Improved Self-Lubricating Spindle Bolsters are being used in my several Mills, and give excellent satisfaction. The saving in oil is full fifty per cent from the old plan of oiling up the machines, and fully meets my approbation.

Very truly,

JAMES Y. SMITH.

Newport, August 27, 1863.

E. N. Steere, Esq.: Dear Sir—We find your Patent Bolsters a great improvement; we find the spindles run a great deal steadier and stiller with your Bolsters, oiled twice a week, than they do in the common ones oiled twice a day, and they save at least seventy-five per cent in oil, and keep the frames and floor neat and clean, and fully meet our expectations in every respect.

A. S. TILLEY, for Perry Steam Mill.

Providence, December 20, 1864.

E. N. Steere, Esq.: Dear Sir—We have been using your Patent Bolsters for the past three years, and find by using one-third of the oil on them that we do on the common Bolster, that they do not wear near so fast then as the common Bolster.

Yours truly,

H. KILBURN, Sup't Providence Steam Mill.

Office of the Continental Mills, Lewiston, March 22, 1867.

E. N. Steere, Esq.: Dear Sir—We have been using your Patent Bolsters for the last four years, and find them a great improvement in the saving of oil and labor. We oil them only twice a week.

Yours truly,

S. J. ABBOTT, Agent.

Cranston, R. I., April 15, 1867.

E. N. Steere: Dear Sir—I have been using your Patent Bolsters for the last four years, and consider them a great saving of oil and labor, and in other respects all that they are represented to be.

Yours respectfully,

J. B. WOOD.

Cincinnati, Ohio, April 6, 1867.

Mr. E. N. Steere:—We have been using your Patent Bolsters on self actors and ring frames, and find them all that is claimed for them, a great saving in oil and time, &c., and would not be without them.

Yours truly,

GOULD, PIERCE & Co.

Office of the Everett Mills, Lawrence, Mass., March 21, 1867.

E. N. Steere: Dear Sir—This is to certify that we have been using your Patent Bolsters since 1862, and find them to be all they are recommended to be in every respect.

Yours truly,

J. M. PEREY, Agent.

Taunton, March 29, 1867.

E. N. Steere: Dear Sir—I have been using your Patent Bolsters for the last four years, and am very much pleased with them, so much so, that I have ordered some more from the F. F. & Machine Co. this week.

Yours most respectfully,

CHARLES ALBRO.

Woonsocket, R. I., April 22, 1867.

E. N. Steere, Esq.: Dear Sir—Your Patent Bolsters we find to be all that you have recommended them to be. They give the most perfect satisfaction, and I would most cheerfully recommend them to the manufacturing community as being just what they need.

Yours truly,

S. A. ALDRICH & CO.

Office of the Oriental Mills, Providence, March 27, 1867.

Mr. E. N. Steere: We have been using your Patent Bolsters for the past five years. We find them a first rate Bolster, requiring not more than half the oil of the common Bolster, and will allow us greater speed to our spindles, with less wear.

Yours truly,

JAS. BROWN, JR., Superintendent.

Warren, R. I., March 20, 1867.

Mr. E. N. Steere: Dear Sir—We are using your Patent Bolsters, and find they save a great deal of oil and time in oiling, and keep the floor neat and free from oil, and give a free and steady motion to the spindles, by being uniformly oiled, and in every respect meet our expectations.

Yours truly,

C. R. CUTLER & CO.

Mansfield Centre, February 4, 1864.

E. N. Steere, Esq.: Dear Sir—We find your Patent Bolsters to have many advantages over the ordinary Bolster, some of which are as follows: First, the great saving of oil; second, the saving of time in oiling; third, the little danger of getting dry, and consequently wearing out, and the steady motion they give to the spindles by being uniformly oiled.

Yours truly,

MERRICK BRO. & CO.

Anchor Cotton Mills, Pittsburg, Pa., April 17, 1868.

Erastus N. Steere, Esq., Providence, R. I.: Dear Sir—We are running our spindles at a very high speed, with your Patent Bolsters, and we regard them to be a very valuable improvement in spinning machinery, and they fully meet our expectations.

Yours,

HOLMES, BELL & Co.
